- Web Development
- OOP
- Software Engineering
- Database Management
- Computer Networks
- Operating Systems

Experience

Core Media   **June 2023 - July 2023**
Web Developer Intern   *Vadodara, Gujarat*

- Developed a full-stack CMS web application for ecommerce management using NextJS
- Implemented Clerk Authentication and handled payments using Stripe, integrated Cloudinary to handle images
- Worked and integrated technologies like Cloudinary, handled deployments using Vercel and Planetscale

Projects

Ecommerce Platform - Balaji Nursery | *MERN stack, Firebase, MUI, Razorpay, Mailjet, Redux Toolkit*

- Created a complete Ecommerce platform using the MERN stack and Firebase for authentication and image store
- Designed and created a minimal, functional, responsive storefront using MUI, where users can browse, purchase, wishlist, track orders
- Integrated Razorpay payment gateway to provide hassle-free checkout for users and Mailjet for order confirmation mailing system
- Designed and created a custom CMS from scratch for admin to manage inventory, track orders and payment status, view customer details and view charts providing transactional and logistical insights

GameTrakr | *React, Express, NodeJS, MongoDB, Netlify*

- Developed a webapp to search, shop, explore and keep track of deals on various games across different stores.
- Created a minimal, responsive UI using React, styled with vanila CSS
- Used MongoDB Atlas for a cloud based no-sql database
- Created custom JWT authorised APIs for authentication and authorization

Personal Portfolio | *NextJS, MUI, Framer Motion, Notionl*

- Created a personal portfolio website to showcase skills and projects
- Uses NextJS and Notion as a CMS
- Deployed on Vercel
